APARTEID IS ALIVE AND WELL IN SOUTH AFRICA!

Here are 7 do-it-yourself action responses to consider...

Wolfram Kistner, retired director of the Dept. of Justice of the So. Africa Council of Churches with Bishop Tutu, and Regina Farisani, spokewomen from S. Africa, spoke at 5 US cities about "Suffering and Hope in S. Africa" in November. Their message was a clear challenge to the U.S. churches.

1. Educate yourself and others on the situation in S. Africa. Don't rely on the mainstream media.
2. Challenge misleading coverage of S. Africa in the mainstream media. The S. African Govt. is waging an international campaign to convince the world that apartheid is over.
4. Form a sister community. Sister relationships can include unions, schools, churches.

5. Keep the pressure on the apartheid Government through your local, state, and federal governments; colleges and religious institutions. Sanctions and investment withdrawal are still good strategies.
6. Fight Racism in the USA. US foreign policy will continue to be racist as long as there is racism here at home.
7. Join the Southern Africa Network (ELCA)
