For some months, an ad-hoc coalition of churches, corporations and community folk have been planning a one-day educational event on South Africa.

We want to share with you our concerns about U.S. investment in South Africa. How extensive is our investment? Is it true that we are all investors? How can we best examine our investment? What are our options? What do we need to know to make sound judgments?

These and other questions will be addressed. We hope to see you there. Join us on Saturday, April 21, at Central United Methodist Church House, 23 E. Adams, Detroit, 48226.

Bill Sutherland, AFSC, "The United States, West Germany, Britain and France provide the economic and military support that permits the white minority government of South Africa to stay afloat in a black African sea."

The moral question of withdrawing investment begins with the economic reality of South Africa's need for foreign money. Without foreign investment - as without black labor - the country would grind to a halt.
