Interrogation Rhodesian Style

In a recent Sunday Providence Journal, Ian Smith claimed that he was not racist but rather paternalist. He conveniently forgets that a form of apartheid exists in Zimbabwe, and he also forgets that his army is killing between 30 and 40 black people every day. He also claims that he is fighting 'black terrorists'; yet it is his racist and illegitimate regime which massacres black people indiscriminately.

Ian Smith, his government and his army are the real terrorists.
